## PREPARATION

### Developing Your Team

Include content experts from different areas of your district to assist with data analysis and service planning; these can include such personnel from areas such as:

- District Data Collection
- Student Services
- Student Assistance Programs
- Building-Level Administration
- Prevention Services Providers

School District (SD) Name:	ABC School District
SD Contact Name:	Team Leader Information Here
SD Contact Phone:	
SD Contact Email:	

Assessment Team

Getting Started Using Your Needs  
Assessment Tool

### HELPFUL HINTS

- When planning out how your team will complete the process, decide on a desired completion date and work backwards setting team meeting dates and completion goals
- Have team members review instructional videos before beginning each section
- Reach out for Technical Assistance as needed

## SUBSTANCES

## Data Review

These tabs provide an opportunity to review your school district data across multiple years. The numbers are colored to match their administration year with the numbers in the top 3 rows representing the total score for your district, Montgomery County, and the State.

While the total number is important to understand, exploring grade-level data will help you better understand where the highest need lies and we suggest that your priorities be focused on grade-level as much as possible. We suggest that you also dive more deeply into the data by exploring trends at different grade levels. This data can be found on the PAYS referenced pages found under the administration year cell.

To gain a better understanding of each data point, your team is encouraged to review the questions that were included in the survey. A list of questions can be found at the beginning of each section of your PAYS report.

The figure that appears in the SD compared to MontCo/State rows indicate how much more- or less-likely your school district is to be experiencing a particular behavior or issue, as compared to the county/state figure. When your school district rate exceeds that of the county/state, the comparison cell will auto-highlight in one of the following ways:

- Yellow = Lower-risk
- Orange = Moderately higher-risk
- Red = Higher-risk
- Blue Lettering/No highlight = Statistically similar

You are welcomed and encouraged to include supporting data from other sources than the PAYS, but including additional data is optional.

Substance Use and Related Behaviors Data

Alcohol Use Data

Alcohol Use Data Continued

Alcohol-Related Behaviors		Alcohol Use (24 Hours)		Alcohol Use (Past 30 Days)		Binge Drinking (Past 30 Days)		Willing to Try Alcohol Before 21		Bare Drunk or High at School (Past 30 Days)		Driving After Alcohol Use (Past Year)

## VIDEO TUTORIAL

### Reviewing Your Data

## VIDEO TUTORIAL

### Analyzing Data/Setting Priorities

### HELPFUL HINT

**While completing the data review, think about these questions:**

- What is the overall impact of the issue?
- How severe is the issue?
- What has happened over time?
- How does the school district rate compare to the county/state rate?

## SUBSTANCES

[DOWNLOAD  
WORKSHEETS  
& EXAMPLES](#)

### SPECIAL NOTE ABOUT PERCEPTIONS & ATTITUDE SECTIONS:

- Just as in other sections, the SD compared to MontCo/State cells highlight with a color when your school district rates exceed that of the county/state rate. However, unlike other sections, exceeding the county/state rate is considered a positive direction in the Perception of Risk and Peer/Individual Perceptions & Attitudes Sections because higher numbers are better in these sections, so the colors have different meanings than in other sections.
- When your school district rate exceeds the county/state rate, the SD comparison will auto-highlight in one of the following ways:
  - Yellow = Slightly Higher
  - Orange = Moderately Higher
  - Red = Significantly Higher

### IMPORTANT SECTION NOTE:

Unlike other data sections, no highlight in this section means your school district is statistically the same as the comparison number. Your team should pay SPECIAL ATTENTION to SD comparisons where NO HIGHLIGHT appears as this means your school district is either at or below the county/state average. Each text color means the following:

- Blue Text:  
Your school district is below the county/state rate (which is in a negative direction)
- Black Text:  
Your school district is statistically the same as county/state rate

appropriate space available within this tool.

- Extra space has been provided if you have other discussion points you would like to share.

### PRIORITIZATION

- Following thorough team discussion, your team should preliminarily select and enter 3-5 substance use and related behavior concerns to consider for goal setting and tracking over time.
- Your team will narrow down these 3-5 concerns to 2-3 priority selections by selecting a rating (provided in the drop-down box in each cell) for each of the following considerations:
  - Magnitude
  - Comparison
  - Severity
  - Time Trend
- Once your team has rated each concern, you will place your top 2-3 priorities in the section to the left. These data points will be used to create your problem statements.

### DATA GAPS

- Are there other data that you feel is missing or is limited that could be valuable in this category in the future?

## Data Analysis

### TEAM DISCUSSION

- Once all data is entered into the appropriate tab(s), your assessment team should begin to work through the questions provided for further discussion in the separate handout, as Word Doc saved as Discussion Worksheets.
- The questions will advise your team to think about trends over time, subpopulations and/or age groups that are impacting the data, as well as areas where you might want to collect more information.
- The final responses from the discussion questions should be entered into the

### HELPFUL HINT

- In-depth instructions are included in each tool, simply click on the cells with red corners for instructions to appear on your screen
- Click on the red corners of the consideration title cells to help you think about how to best rate each consideration.
- Hover over the cells with red corners view the definition of each service type. For more information about the County Mental Health Data, contact [SAP@MontCoPa.org](mailto:SAP@MontCoPa.org)

DOWNLOAD  
WORKSHEETS  
& EXAMPLES

TEAM DISCUSSIONS:

What are the top 3-5 areas where your students are doing well?

2019: Perscription and Over-the-Counter Medications, Cigarettes, Smokeless Tobacco; alcohol in 12th grade; binge drinking down in 10th and 12th grades; 12th graders down in driving after alcohol use.

2021:

What are the tope 3-5 most prevalent school and community issues found in your school district?

2019: Marijuana in 12th grade, Vaping Marijuana. Drunk or high at school (grade 10); getting alcohol from parents; marijuana lifetime. OFFERED ILLEGAL SUBSTANCES AT SCHOOL both 2017 and 2019; vaping nicotine big increase in all grades; vaping other substances in 2017 and 2019.

2021:

Which items showing as at or above the county/state rate stand out as potential concerns and why?

2019: Marijuana - 30-Day - 10th & 12th grades, vaping, Marijuana, Binge Drinking. The activities happening at school - being drunk or high and being offered drugs.

2021:

Which items stand out as a potential concern because they are increasing over time? List the items and include any other relevant details about the time-trend(s) that you see.

2019: Being drunk or high in school in both grade 8 and 10. Increase in vaping in grade 8

2021:

For any of the items noted in the questions above, which grade levels are most impacted? Include any other observations about trends by grade.

2019: Grade 8 and grade 10. grade 8 vaping increasing.

2021:

Are there certain schools, subpopulations, demographic groups or pockets within the community that are having a significant impact on the data? If yes, list and explain.

2019:

2021:

Are there any items not listed in any of the questions above that stand out as a potential concern for a specific population (e.g. special needs students, demographic, etc.)? If yes, list and explain.

2019:

2021:

Other Comments

Use the following prioritization matrix below to further assist you in prioritizing your areas of concern:

Area of Concern	Magnitude	Severity	Time-Trends	Comparison	Grades, Locations or Subpopulations of Concern
2019: Offered illegal substances at school 2021:	3	5	Increasing	Much Higher (Red)	2019: Increased at grades 8 & 10 2021:
2019: Vaping marijuana 2021:	2	2	Increasing	Much Higher (Red)	2019: Overall vaping rates similar to county & less than state, increasing over time- with more students in district choosing to vape marijuana compared to state 2021:
2019: Being drunk at school 2021:	1	1	Increasing	Elevated (Yellow)	2019: Increased in Grade 8 & 10- elevated compared to county, same as state 2021:
2019: Increased use of marijuana 2021:	5	4	Increasing	Elevated (Yellow)	2019: Large increase in use between 10th & 12 grades 2021:
2019: Access to alcohol from parents 2021:	4	3	Increasing	Much Higher (Red)	2019: Lifetime alcohol rates are similar to state and county; reported rates are more prevalent than other substances 2021:

Substance Use and Related Behaviors Data Priorities

Prioritization Selection(s):	Specific Populations?	Brief Description/Notes:
2019: Marijuana & Vaping 2021:		2019: Increased rate of use in different forms 2021:
2019: Illegal Drugs 2021:		2019: Reported access at school 2021:
2019: Alcohol 2021:		2019: Most prevalent substance used 2021:

DATA GAPS:

What data are we missing?

ACTION REPORT:

MONTGOMERY COUNTY SCHOOL DISTRICT  
PREVENTION PLANNING PROCESS SUPPLEMENTAL INSTRUCTION GUIDE

## MENTAL HEALTH

## Data Review

Visit page 5 for general directions on Data Review for this section.

### CROSS TAB – DEPRESSION AND SUBSTANCE ABUSE

- Be sure to visit page 62 in your PAYS report to gain a better understanding of what this data is telling you.
- This section provides the opportunity for you to see different data points relate to each other, i.e. the link between those who report experiencing depressive symptoms and their substance use.
- This section showcases the direct link between the level of depressive symptoms and substance use. The color key listed to the right, provides you with a guide of the level of depression cross-tabulated with various substances.

### CROSS TAB: BULLYING AND DEPRESSION/SUICIDE

- Be sure to visit page 63 in your PAYS report to gain a better understanding of what this data is telling you.
- This section provides the opportunity to see how different data points relate to each other, i.e. how those experiencing bullying also experience mental health issues such as depression/suicide.
- This chart shows the direct link between bullying and mental health issues. The blue and purple boxes show the number of respondents who answered yes or no to the questions listed in grey boxes above them. Again, showcasing a direct link between those who reported being bullied and serious mental health issues.

## SPECIAL NOTES ABOUT COUNTY MENTAL HEALTH DATA

- The number of Access Mobile Crisis Calls are inclusive only of referrals made by your school district and are collected by school year.
- The remaining numbers are based on Magellan Behavioral Health claims for services funded through Medical Assistance for Montgomery County. These numbers DO NOT represent the total number of services received in your school district and they do not include alternatively -funded services. This data is not specific to your district because data records are collected by zip code and would not provide you with accurate information.

### Data Analysis

Click the Substance Tab above to learn more.

### TEAM DISCUSSION

- Once all data is entered into the appropriate tab(s), your assessment team should begin to work through the questions provided for further discussion in the separate handout, as Word Doc saved as Discussion Worksheets.
- The questions will advise your team to think about trends over time, subpopulations and/or age groups that are impacting the data, as well as areas where you might want to collect more information.
- The final responses from the discussion questions should be entered into the appropriate space available within this tool.
- Extra space has been provided if you have other discussion points you would like to share.

### PRIORITIZATION

- Following thorough team discussion, your team should preliminarily select and enter 3-5 substance use and related behavior concerns to consider for goal setting and tracking over time.
- Your team will narrow down these 3-5 concerns to 2-3 priority selections by selecting a rating (provided in the drop-down box in each cell) for each of the following considerations:
  - Magnitude
  - Comparison
  - Severity
  - Time Trend
- Once your team has rated each concern, you will place your top 2-3 priorities in the section to the left. These data points will be used to create your problem statements.

### DATA GAPS

- Are there other data that you feel is missing or is limited that could be valuable in this category in the future?

#### TEAM DISCUSSION:

What are the top 3-5 areas where your students are doing well?

2019: Prescription and Over-the-Counter Medications, Cigarettes, Smokeless Tobacco; alcohol in 12th grade; binge drinking down in 10th and 12th grades; 12th graders down in driving after alcohol use.

2021:

What are the top 3-5 most prevalent school and community issues found in your school district?

2019: Marijuana in 12th grade, Vaping Marijuana. Drunk or high at school (grade 10); getting alcohol from parents; marijuana lifetime. OFFERED ILLEGAL SUBSTANCES AT SCHOOL both 2017 and 2019; vaping nicotine big increase in all grades; vaping other substances in 2017 and 2019.

2021:

Which items showing as at or above the county/state rate stand out as potential concerns and why?

2019: Marijuana - 30-Day - 10th & 12th grades, vaping, Marijuana, Binge Drinking. The activities happening at school - being drunk or high and being offered drugs.

2021:

Which items stand out as a potential concern because they are increasing over time? List the items and include any other relevant details about the time-trend(s) that you see.

2019: Being drunk or high in school in both grade 8 and 10. Increase in vaping in grade 8

2021:

For any of the items noted in the questions above, which grade levels are most impacted? Include any other observations about trends by grade.

2019: Grade 8 and grade 10, grade 8 vaping increasing.

2021:

Are there certain schools, subpopulations, demographic groups or pockets within the community that are having a significant impact on the data? If yes, list and explain.

2019:

2021:

Are there any items not listed in any of the questions above that stand out as a potential concern for a specific population (e.g. special needs students, demographic, etc.)? If yes, list and explain.

2019:

2021:

Other Comments

Use the following prioritization matrix below to further assist you in prioritizing your areas of concern:

Area of Concern	Magnitude	Severity	Time-Trends	Comparison	Grades, Locations or Subpopulations of Concern
2019: Offered illegal substances at school 2021:	3	5	Increasing	Much Higher (Red)	2019: Increased at grades 8 & 10 2021:
2019: Vaping marijuana 2021:	2	2	Increasing	Much Higher (Red)	2019: Overall vaping rates similar to county & less than state, increasing over time with more students in district choosing to vape marijuana compared to state 2021:
2019: Being drunk at school 2021:	1	1	Increasing	Elevated (Yellow)	2019: Increased in Grade 8 & 10 - elevated compared to county, same as state 2021:
2019: Increased use of marijuana 2021:	5	4	Increasing	Elevated (Yellow)	2019: Large increase in use between 10th & 12 grades 2021:
2019: Access to alcohol from parents 2021:	4	3	Increasing	Much Higher (Red)	2019: Lifetime alcohol rates are similar to state and county; reported rates are more prevalent than other substances 2021:

#### Substance Use and Related Behaviors Data Priorities

Prioritization Selection(s):	Specific Populations?	Brief Description/Notes:
2019: Marijuana & Vaping 2021:		2019: Increased rate of use in different forms 2021:
2019: Illegal Drugs 2021:		2019: Reported access at school 2021:
2019: Alcohol 2021:		2019: Most prevalent substance used 2021:

#### DATA GAPS:

What data are we missing?

#### ACTION REPORT:

Further details on what include in your Action Plan Report ideas for what to include.

### HELPFUL HINT

- In-depth instructions are included in each tool, simply click on the cells with red corners for instructions to appear on your screen
- Click on the red corners of the consideration title cells to help you think about how to best rate each consideration.

### Risk Factors

#### DATA REVIEW:

- Once all data is entered into the appropriate tab(s), your assessment team should begin to work through the questions provided for further discussion in the separate handout, as Word Doc saved as Discussion Worksheets.
- The questions will advise your team to think about trends over time, subpopulations and/or age groups that are impacting the data, as well as areas where you might want to collect more information.
- The final responses from the discussion questions should be entered into the appropriate space available within this tool.
- Extra space has been provided if you have other discussion points you would like to share.

#### PRIORITIZATION:

- Following thorough team discussion, your team should preliminarily select and enter 4-5 RPF concerns to consider for prioritization and tracking over time. Your team will want to focus on RPF concerns that are most related to your problem behaviors outlined in your logic model. Each priority RPF should connect to at least one problem statement, but it is likely that one RPF will connect to multiple problem statements.
- Your team will narrow down these 4-5 concerns to a minimum of 2-3 priority selections by selecting a rating (provided in the drop-down box in each cell) for each of the following considerations:
  - Magnitude
  - Level of Importance
  - Time Trends
  - Comparison
  - Changeability

NA Tool Tab 5:  
Analyzing/Prioritizing Your RPFs

#### HELPFUL HINT

- In-depth instructions are included in each tool, simply click on the cells with red corners for instructions to appear on your screen
- Hover over the cells with red corners to help you think about how to best rate each consideration. Once your team has rated each concern, you will place your top 2-3 RPF priorities in the section to the left and note if there are special populations that will be a focus of the priority.

## RISK & PROTECTION

[DOWNLOAD  
WORKSHEETS  
& EXAMPLES](#)

### Protective Factors

#### DATA ANALYSIS:

- Review your school district data found in this tool. The numbers in School District % columns represent the total scores for your district for each administration. It is important that you take a closer look at the data found for specific grade levels that are most impacting the data.
- To gain a better understanding of each PF score, your team is encouraged to review the questions that were included in the survey. Seven of the eight PF scores are determined by combining the scores of multiple questions while the Religiosity PF is based solely on one question. The RPF Definitions and Scale Questions are defined in your PAYS report.
- Just as in the risk factor section, the SD compared to MontCo/State cells in the PF section also highlight with a color when your school district rates exceed that of the county/state rate. However, unlike the RF section, exceeding the county/state rate is considered a positive direction in the PF Section because higher numbers are better, so the colors have different meanings here than in other sections.
- When your school district rate exceeds the county/state rate, the SD comparison will auto-highlight in one of the following ways:
  - Yellow = Slightly Higher
  - Orange = Moderately Higher
  - Red = Significantly Higher
  - No highlight means your school district is statistically the same as the comparison number.

#### DATA GAPS:

- Are there risk/protective factor data you that feel is missing or is limited that could be valuable in this category in the future?

What are the top 3-5 risk/protective factors where your students are doing well?
2019: Community rewards for prosocial involvement
2021:
What are the five (5) highest total score risk factors? What are the three lowest (3) total score protective factors? (Found in column E)
2019: Perceived risk of drug use, family attitudes favorable toward ASB, low commitment to school
2021:
Five (5) Highest Total Score Risk Factors -
Three (3) Lowest Total Score Protective Factors -
NEW!! Which risk factors were selected as high risk risk when analyzing each grade? Which protective factors were selected as low protection when analyzing each grade? List the grade and risk/protective factor.
2021:
High Risk Factors by Grade -
Low Protective Factors by Grade -
Which risk factors showing as above the state rate, and protective factors below the state rate, stand out as potential concerns and why? i.e. Risk factors that are low but above the county/state rate, may be less of a concern as compared to a risk factor that is impacting more youth but falls under the state rate.
2019: school opportunities and school rewards for prosocial involvement are relatively lower
2021:
Which risk/protective factors stand out as a potential concern because they are increasing/decreasing over time? List the items and include any other relevant details about the time-trends you see.
2019: Religiosity
2021:
Review the CTC Risk Factors & Related Behaviors Chart located to the right to have a better understanding of how RF related to problem behaviors. Which risk/protective factors are likely the most influential on the problems you prioritized in the Substances, Mental Health, and School-Comm tabs?
2019: Perceived availability of handguns
2021:
For any of the items noted in the questions above, which grade levels are most impacted? Include any other observations about trends by grade.
2019: Grade 12 - perceived availability of guns and lower neighborhood attachment
2021:
Are there certain schools, subpopulations, demographic groups or pockets within the community that are having a significant impact on the data? If yes, list and explain.
2019:
2021:
Are there risk/protective not listed in any of the questions above that stand out as a potential concern for a specific population (e.g. special needs students, demographic, etc.)? If yes, list and explain.
2019:
2021:
Other Comments
2019:
2021:

#### HELPFUL HINT

- Remember: LOWER scores for risk factors are better and HIGHER scores for protective factors are better

## SMART GOALS

[DOWNLOAD  
WORKSHEETS  
& EXAMPLES](#)

### Setting Your Goals

#### Setting Long-Term Behaviors, Perceptions, and Attitudes (BPAs)

##### SMART Goals:

- Write SMART Goals for each Behavior, Perception, Attitude related to your problem statement; set goals 7-9 years in the future. An example is provided in row 6.

#### Setting Long-Term Risk & Protective Factors (RPFs) SMART Goals:

- Write SMART Goals for each Risk &/or Protective Factor related to your problem statement; set goals 7-9 years in the future. An example is provided in row 13.

#### Biennial Benchmarks Tracking:

- After determining the amount of change you are targeting over time, determine the bi-annual benchmark that needs to be achieved to reach your long-term goal.
- You will determine your bi-annual benchmark by taking the total amount of desired change and divide it by the number of years you have set in your goal. For decimals, simply round to the next whole number if desired. See the example in your tool for further information.
- You will then track your progress in the upcoming years.
- To calculate the biennial target benchmark, simply subtract your Target Goal from your Baseline and divide by the number of administrations you plan to track your goal.

Measurable goals can be tracked, allowing you to see your progress. They also tell you when a goal is complete.

A

ATTAINABLE

Are you able to take action to achieve the goal? Actionable goals ensure the steps to get there are within your reach.

R

RELEVANT

Avoid overwhelm and unnecessary stress and frustration by making the goal realistic.

T

TIME BOUND

a date helps us stay focused and motivated, inspiring us and providing something to work towards.

HELPFUL HINT

- Remember: Risk and Protective Factors relate to more than once behavior, so you will most likely use your Risk and Protective Factors more than once and can simply copy and paste for each reuse

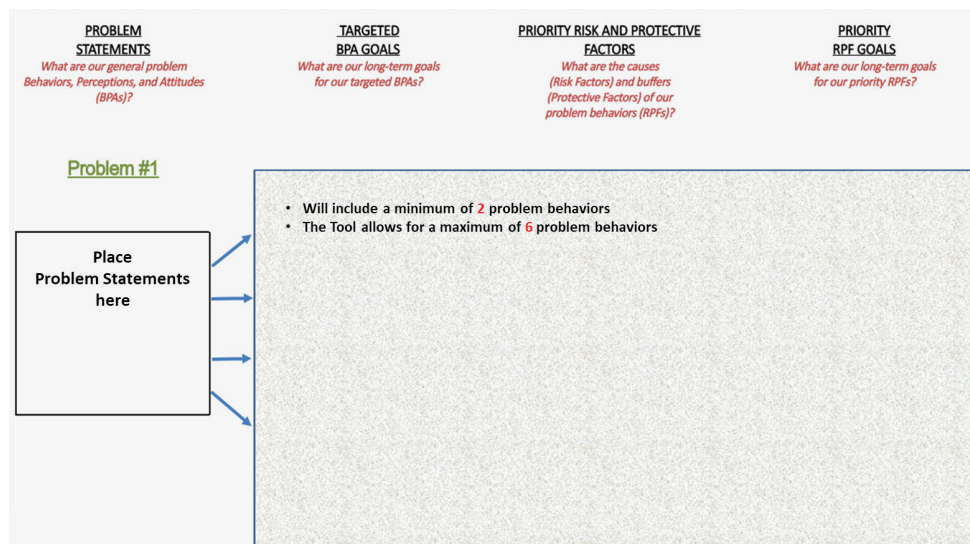

## LOGIC MODEL

### Creating Your Logic Model

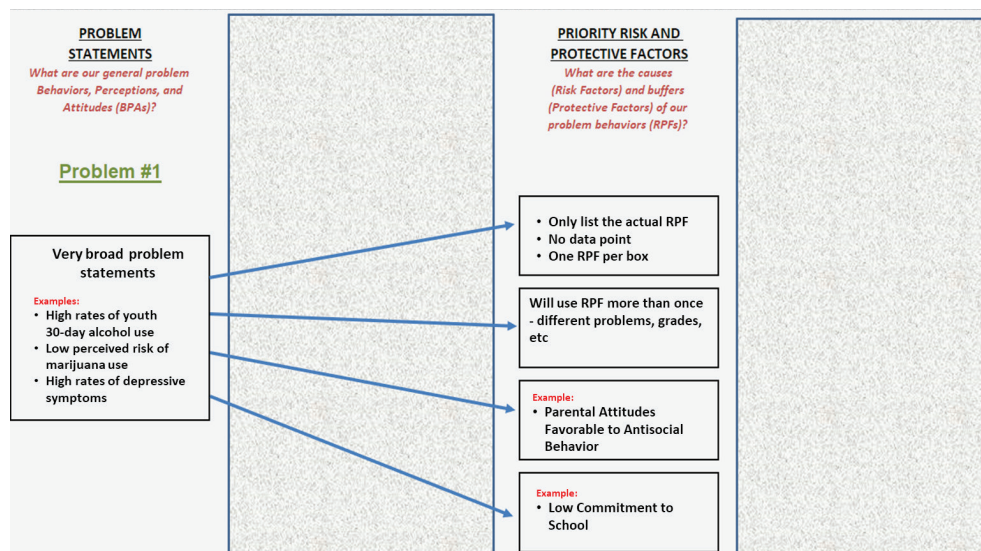

#### PROBLEM STATEMENT

- Use the problem areas to identified in the Substances, Mental Health, School-Community data analysis to create broad problem statements that define the issues seen in your school district. Use the Developing Your Problem Statements Worksheet to create the statements and write one problem statement in each box labeled Problem #x.
- These should be very general, broad statements that define the problems for your school district and not the exact data point that will be tracked over time. These statements should be broad statements such as:
  - High rates of youth alcohol use
  - High rates of youth reporting depressive symptoms
- It is important to note that the more broadly the problem statement is written, the higher the likelihood that there will multiple data points that can be used to measure the success of your efforts over time. For example:
  - Problem Statement: High rates of youth alcohol use
  - Possible data points to track over time: 30-day alcohol use, lifetime alcohol use, driving under the influence, perception of harmfulness of drinking one or more drinks each day

#### PRIORITY RPF

- Take each priority RPF determined while working in the RPF tab and connect them to each problem statement where you feel they are having the most impact. Since RPFs relate to more than one problem, you will most likely use each RPF more than once.
- At a minimum, provide at least one RPF for each problem statement. If applying more than one RPF to a problem statement, place only one RPF in each box.

Check out pages 15 and 16 for instructions and completed examples.

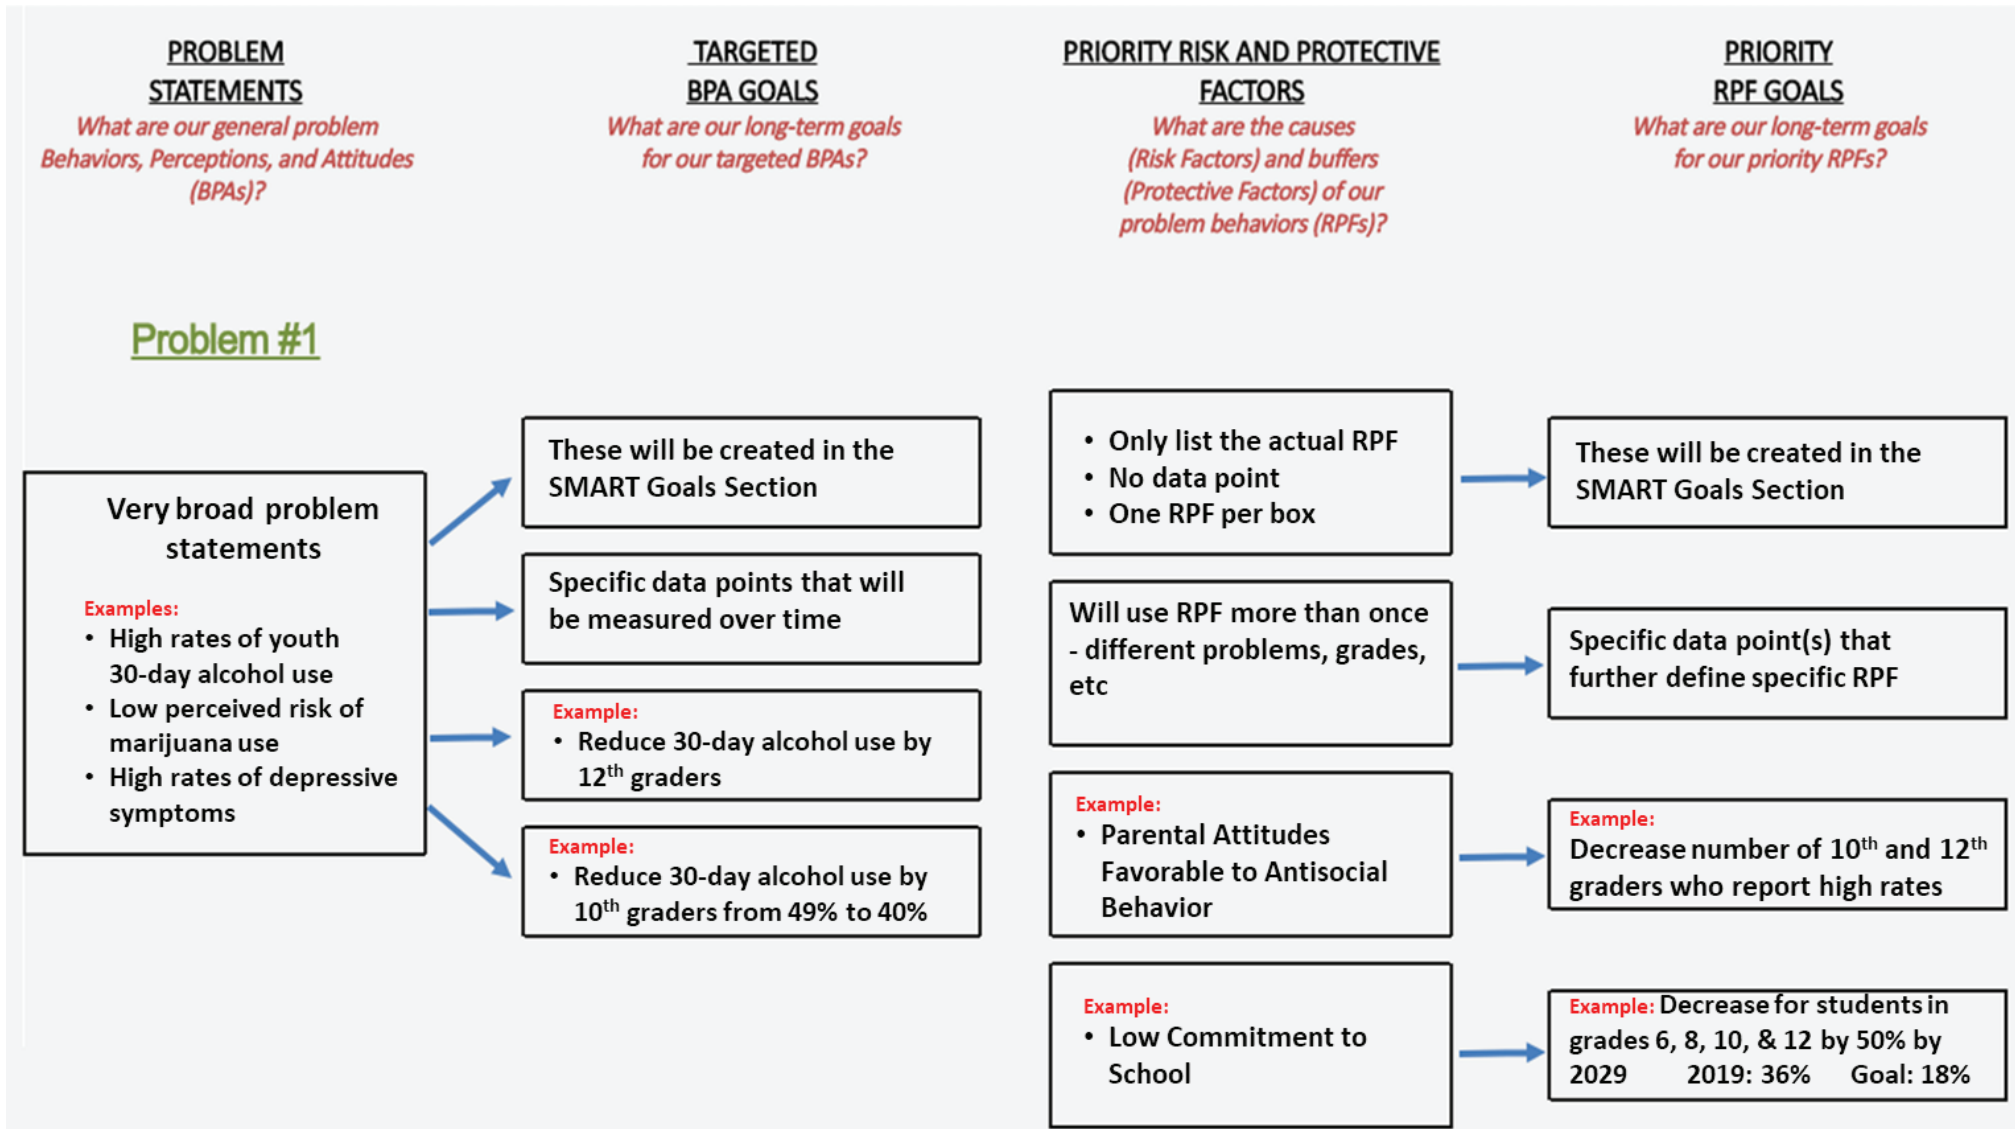

#### HELPFUL HINT

- The actual data points that will be measured will be identified and goals will be written in the SMART Goals Section of the tool.
- The rest of the Logic Model will be filled out as your team progresses through the tool.

## LOGIC MODEL

### TARGETED BPA & PRIORITY RPF GOALS

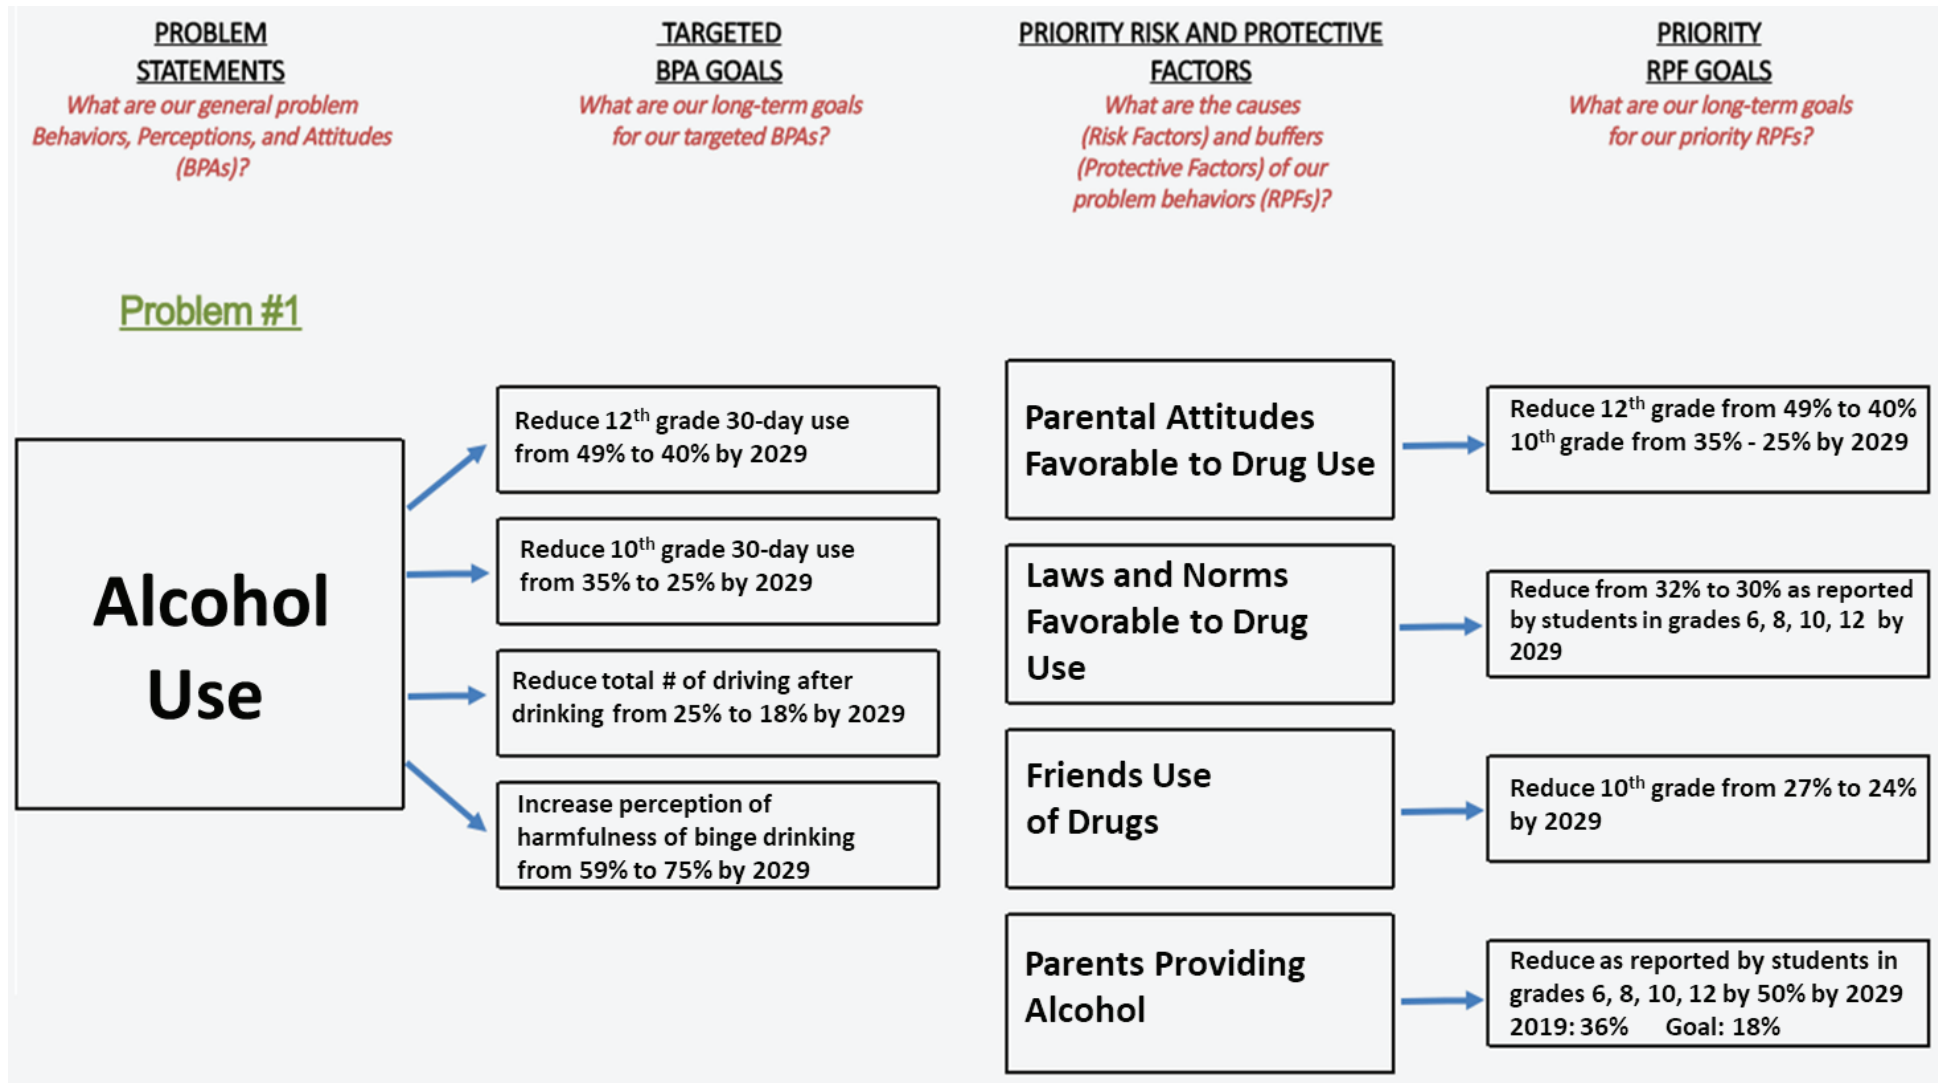

- Put each goal created in the SMART Goals Tab into the correlated box.
- Put only one goal in each box.

## LOGIC MODEL

### COMPLETED LOGIC MODEL

Creating Your Logic Model

## RESOURCE ASSESSMENT

### Creating Your Resource Assessment

#### USING YOUR NEEDS ASSESSMENT TO GUIDE YOUR RESOURCE ASSESSMENT

- Your Goals and Logic Model tabs from your Needs Assessment have been incorporated into your Resource Assessment Tool
- Use these tabs to when considering what resources to include in your assessment
- Remember: You only want to list the resources that are directly related to your Risk/Protective
- Factor priorities determined in during your Needs Assessment

#### SUMMARIZING YOUR RESULTS

- Columns A-F will pre-populate from input from each grade-level tab from the analysis sections
- You must scroll down to see grades 9-12
- To create your “landscape”, simply transfer information from columns E & F into the appropriate grade-level boxes; this will pre-populate your Landscape Tab

Grades K-5: Overall Strengths	
Representation of 100% in all elementary schools districts	
The number of direct counseling services for elementary-aged students	
Grades K-5: Areas for Improvement	
Need more universal primary prevention programs in our elementary schools	
Need to strengthen partnerships with community and service agencies	
Grades K-5: General Recommendations	
Need to explore universal programming for K-5 students to see what would be the best fit	
Seek funding opportunities for universal programming for K-5 students

Safe Harbor Grief Group	Safe Harbor Grief Group	Safe Harbor Grief Group	Safe Harbor Grief Group

Grades 6-8: Overall Strengths	
We have programs that address both mental health and substance use	
The programs are conducted with fidelity	
We have all three tier levels of intervention covered in our programs	
Grades 6-8: Areas for Improvement	
We should identify a method to increase referrals to after school enrichment programs	
We should get feedback from parents regarding programs in which they would like for their child to participate	
We should involve the community in program development	
Grades 6-8: General Recommendations	
Increase the number of re-occurring prevention programs	
Have more resources for students struggling with mental health challenges	
Have more resources for students struggling with drug and alcohol issues	
Have more parent workshops held in the community

#### HELPFUL HINT

- Programs, Practices and Strategies and Areas of Strength and Challenge will pre-populate into your Summary Tab!

## SERVICE REQUESTS

## County-Funded Service Requests

## ENGAGING YOUR SERVICE PROVIDER

Your service provider is a valuable member of your Resource Assessment Team! They are poised to assist you in selecting programs and services that will best fit your needs by assisting you with better understanding the outcomes and objectives of each county-offered activity and providing you with knowledge of what it will take to implement each activity to determine if it is a feasible selection for your district.

## COUNTY-FUNDED PREVENTION PROGRAM REQUESTS

After reviewing the Summary Tab, complete this tab to show what your recommendations are for your prevention plan. All programs and strategies list here are those supported by Montgomery County Offices of Drug & Alcohol (D&A) and Mental Health (MH). Review eligible requests from supplemental program guide.

Please note these special implementation adaptations:

- **Too Good for Drugs:** You are allowed to only do 8 sessions with this program, but it is recommended that you do the 10 sessions as designed. Please note this adaptation request in the comments section and your service request will be adjusted accordingly.

Botvin Life Skills requires multi-grade implementation:

- 7th Grade implementation also requires 6th grade implementation
- 8th Grade implementation also 6th and 7th grade implementation
- Hints to keep in mind when developing your requests:
- Evidence-Based Programs are required to be facilitated by your SAP/Prevention provider to fidelity by Montgomery County SCA to fulfill state funding parameters.
- A teacher or staff member from your district must be present in the classrooms for the entirety of the lesson.
- SAP/Prevention providers staffing capacity necessitates schedules that are created with back-to-back activities. Final details of programs and scheduling will be agreed upon between providers and districts and contingent on availability of funding.
- If you'd like to discuss the scope of county-funded services prior to completing this section, please contact [SAP@MontCoPa.org](mailto:SAP@MontCoPa.org).

## HELPFUL HINT

- Use the Other Desired Prevention Activities section as your WISH LIST of strategies/activities that you would like to include in your prevention landscape!

## SERVICE REQUESTS

## STUDENT ASSISTANCE PROGRAM (SAP) SCHOOL TEAM &amp; GROUP REQUESTS

Be sure to list all schools that are requesting services from an SAP School Team. Montgomery County Offices of D&A and MH issued SAP policies to guide the formation and facilitation of SAP Services by your SAP provider. SAP Provider agencies may not meet with a student without parental/caregiver permission for any reason, including group participation.

SAP Providers and school districts agreement around the following will allow for the greatest opportunity for partnership:

- Availability of a confidential space with access to a phone
- Flexibility for student release to meet when the provider staff is on-site at your school, a process by which permission for participation in county-funded SAP Services is provided by the district to the SAP Provider staff
- While your district is welcomed to create and implement your own SAP policies & protocols, we encourage you to reach out to your service provider for more information and to answer questions regarding policies for all county-funded services.

Student Assistance Program (SAP) Team Service Requests

Provide list of school building names where you are requesting SAP Team services.	Does this school currently have an SAP Team?	Service Type: New, Continuation, or Expansion	How often would you like for your SAP provider to attend your SAP Team Meeting?	Projected number of SAP Team Meetings per year SAP provider will attend	How long do you anticipate a typical SAP Team Meeting will last?	Total Number of Service Hours	If known, list the days of the week and times your SAP team meetings will be held.
ABC High School	Yes	Expansion	Monthly	10	1	10	Second Tuesday of every month from Aug-Jun
XYZ Middle School	No	New	Bi-Weekly	19	1	19	Every other week from Sept 1st - May 31st
PQR Elementary	Unsure	Don't Know	As Needed	10	0.5	5	Services to begin from Oct 1st - May 31st
TOTALS				39		34	

SERVICE REQUESTS

Other Desired Prevention Activities

In this section you will list other prevention activities not being offered by the county that you would like to conduct; these activities will be supported by funding sources other than county funding.
